Academic Break Policy – Langley Flying School Students

To support student well-being and provide time for rest, travel, or personal study, **Langley Flying School observes an annual Academic Break.**

1. Break Period

- **December 15 to January 5** each year is designated as the **Academic Break**.
-

2. Ground School

- **No ground school classes** will be scheduled during the break period.
 - Administrative offices will be available on a limited basis for urgent matters only.
-

3. Flight Training

- **Flying during the break is optional.**
 - Students may choose to continue flight training if they wish, subject to instructor and aircraft availability.
 - Students who prefer not to fly during this period may pause their training without penalty.
-

4. Bookings & Cancellations

- Students who want to fly during the break must book lessons in advance through the usual scheduling system.
 - Normal cancellation policies still apply for booked flights during the break.
-

5. Administrative Notes

- Instructors' availability may be reduced during the break; priority scheduling is first-come, first-served.
 - Students should ensure their Transport Canada documents, visa status, or medicals remain valid if planning extended travel during this time.
-

6. Support During Break

- The Learning Support Coordinator and Program Assistance staff will respond to emails periodically but may have limited office hours.
 - Emergency contacts (see Critical Incident & Crisis Management Policy) remain in effect.
-

Tip for Students:

Use the Academic Break for rest, review, or catching up on self-study. If you plan to travel internationally, check visa and entry requirements well in advance.
